

We want the best possible cancer therapy.

SCORED

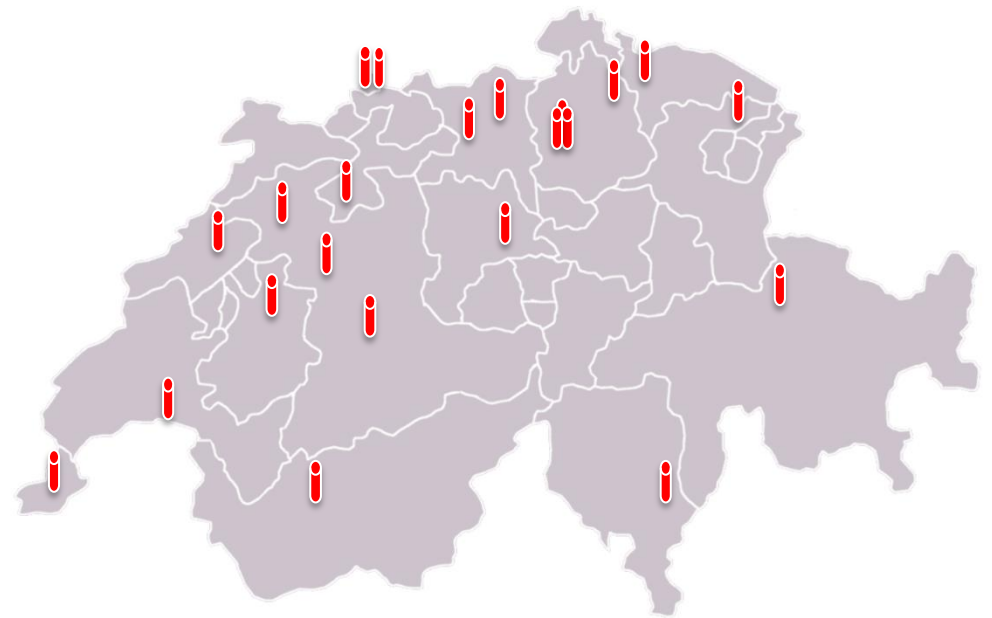

Swiss Centralized Oncology Real-world Evidence Data

Fighting cancer by providing nationwide evidence of clinical practice

Charlotte Maddox - Oncosuisse “Daten und Register” – June 27, Bern

SCORED – The Vision

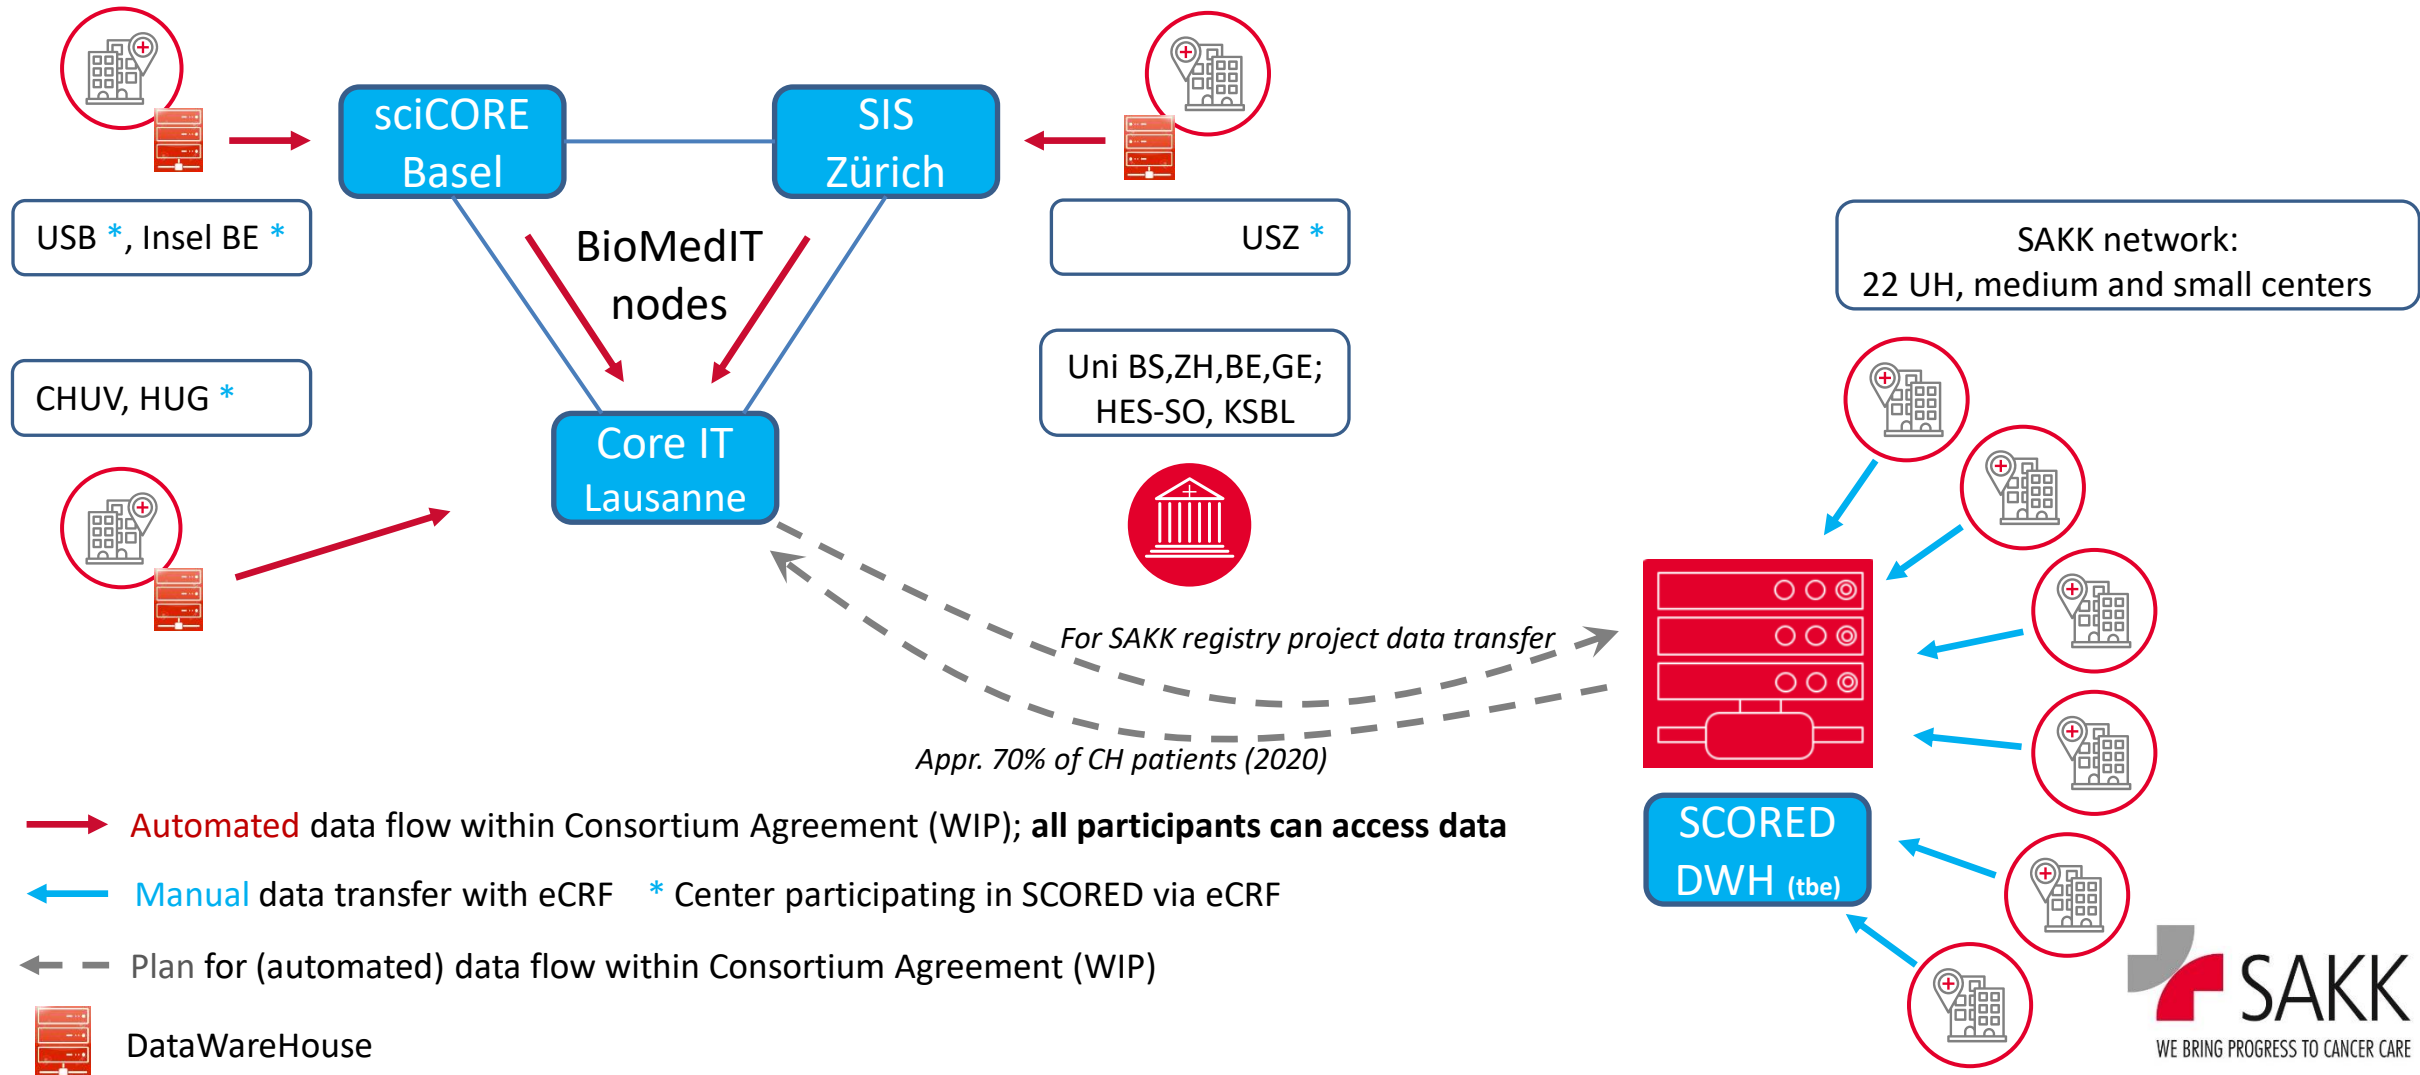

Based on the highly uneven / fractionated registry landscape in Switzerland in 2019, SAKK envisioned to...

- build up the first **nationwide centralized infrastructure at SAKK** to collect oncology real world evidence data from clinical practice (22 oncology hospitals/centers)
- **Make data interoperable** by collecting structured data, i.e. by pre-defined parameters (**core data set**) and store the data at SCORED data warehouse for future analyses
- Support the need for **structured data collection** and **automatic data transfers**, *also in non-University hospitals*
- **Foster collective learning** throughout Switzerland's hospitals by sharing the results from all SCORED research projects
- **Advance efficient cancer care** by collaborating with all health care partners

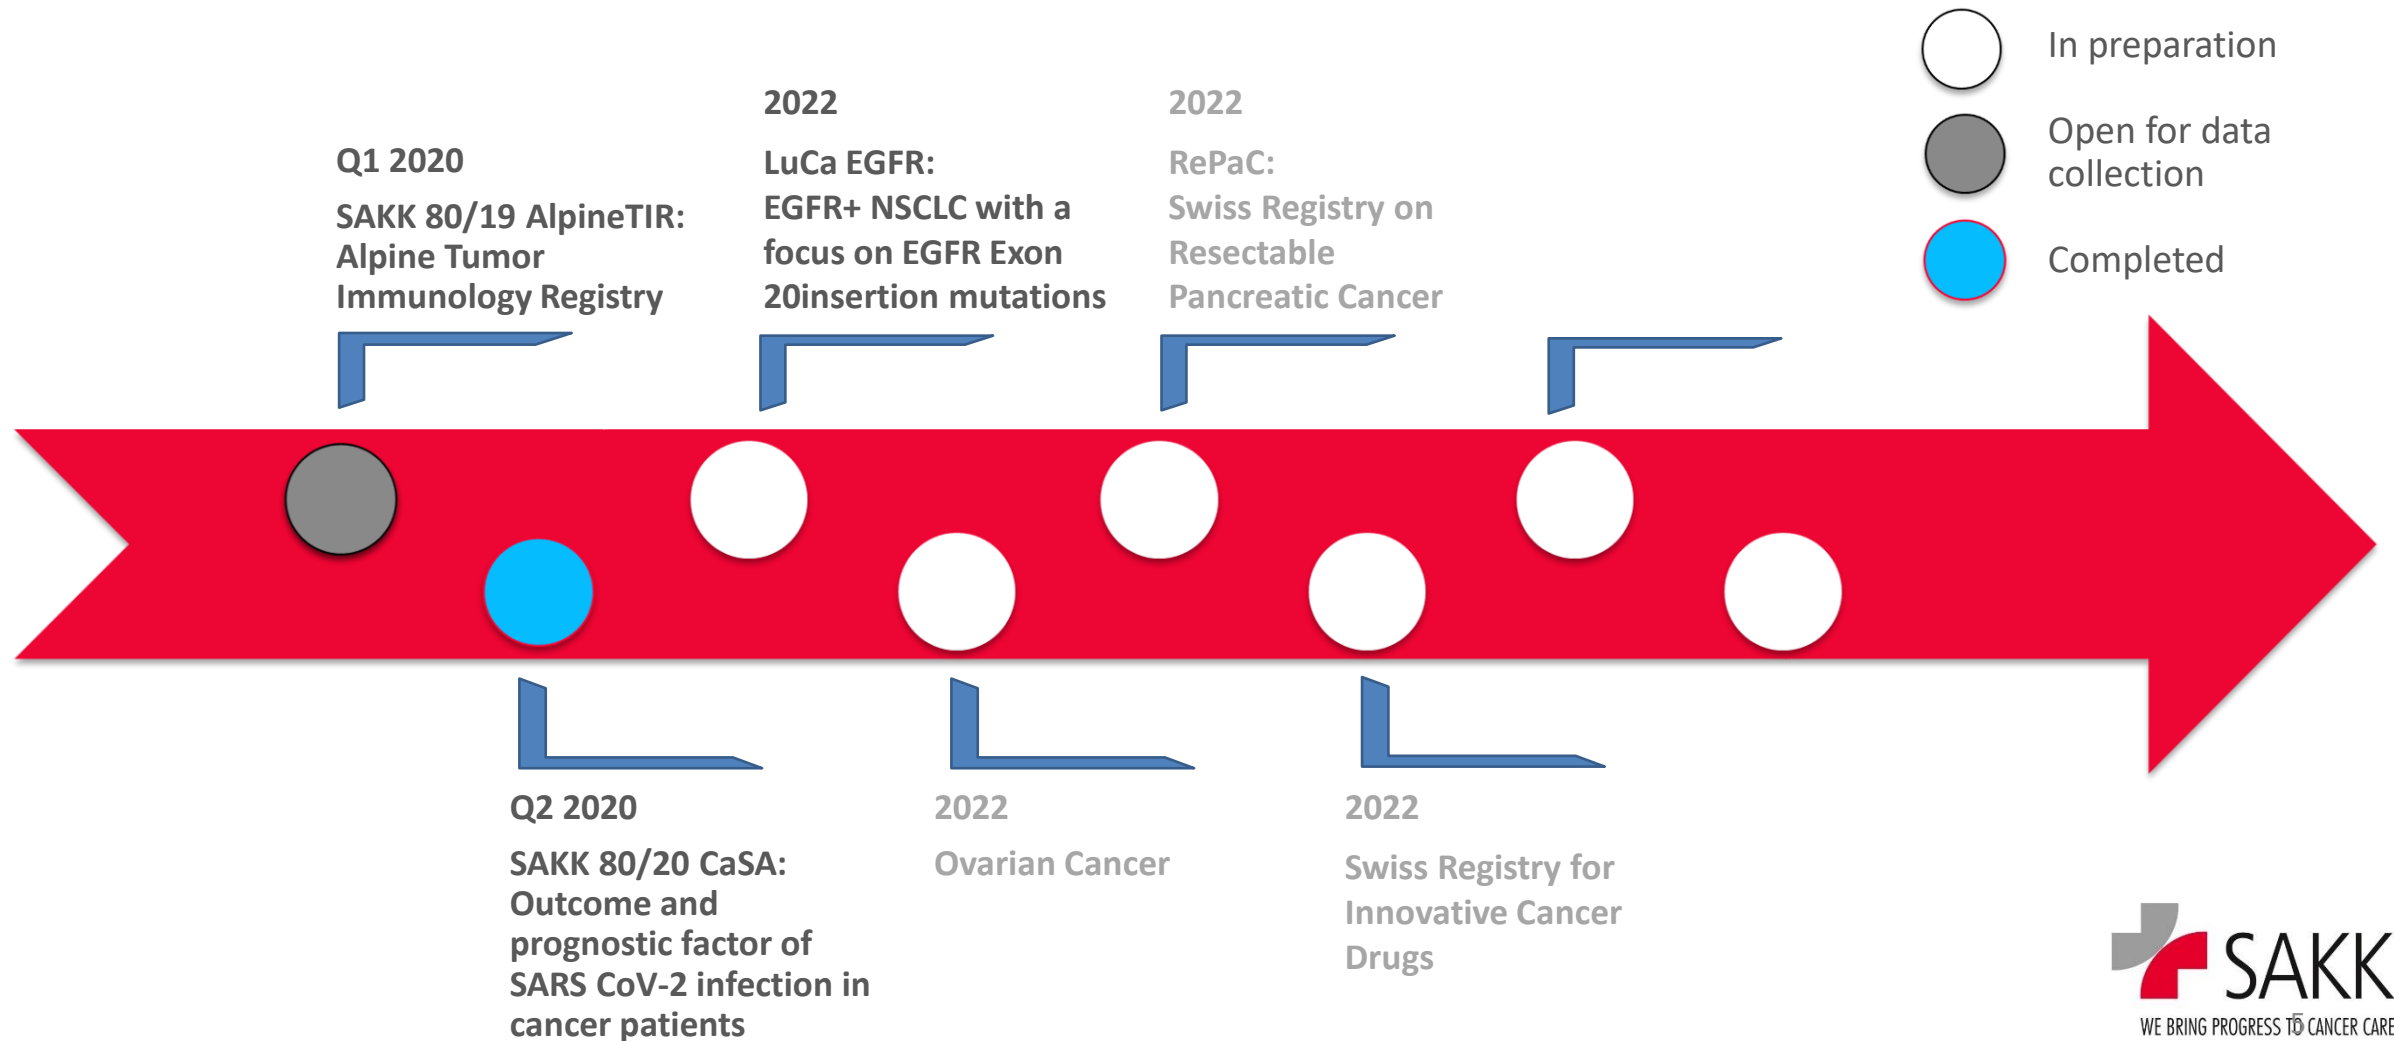

SCORED Status (I): Fostering Data Sharing and Interoperability

SPO consortium (left) and SCORED registries are working towards FAIR data collection & evaluation

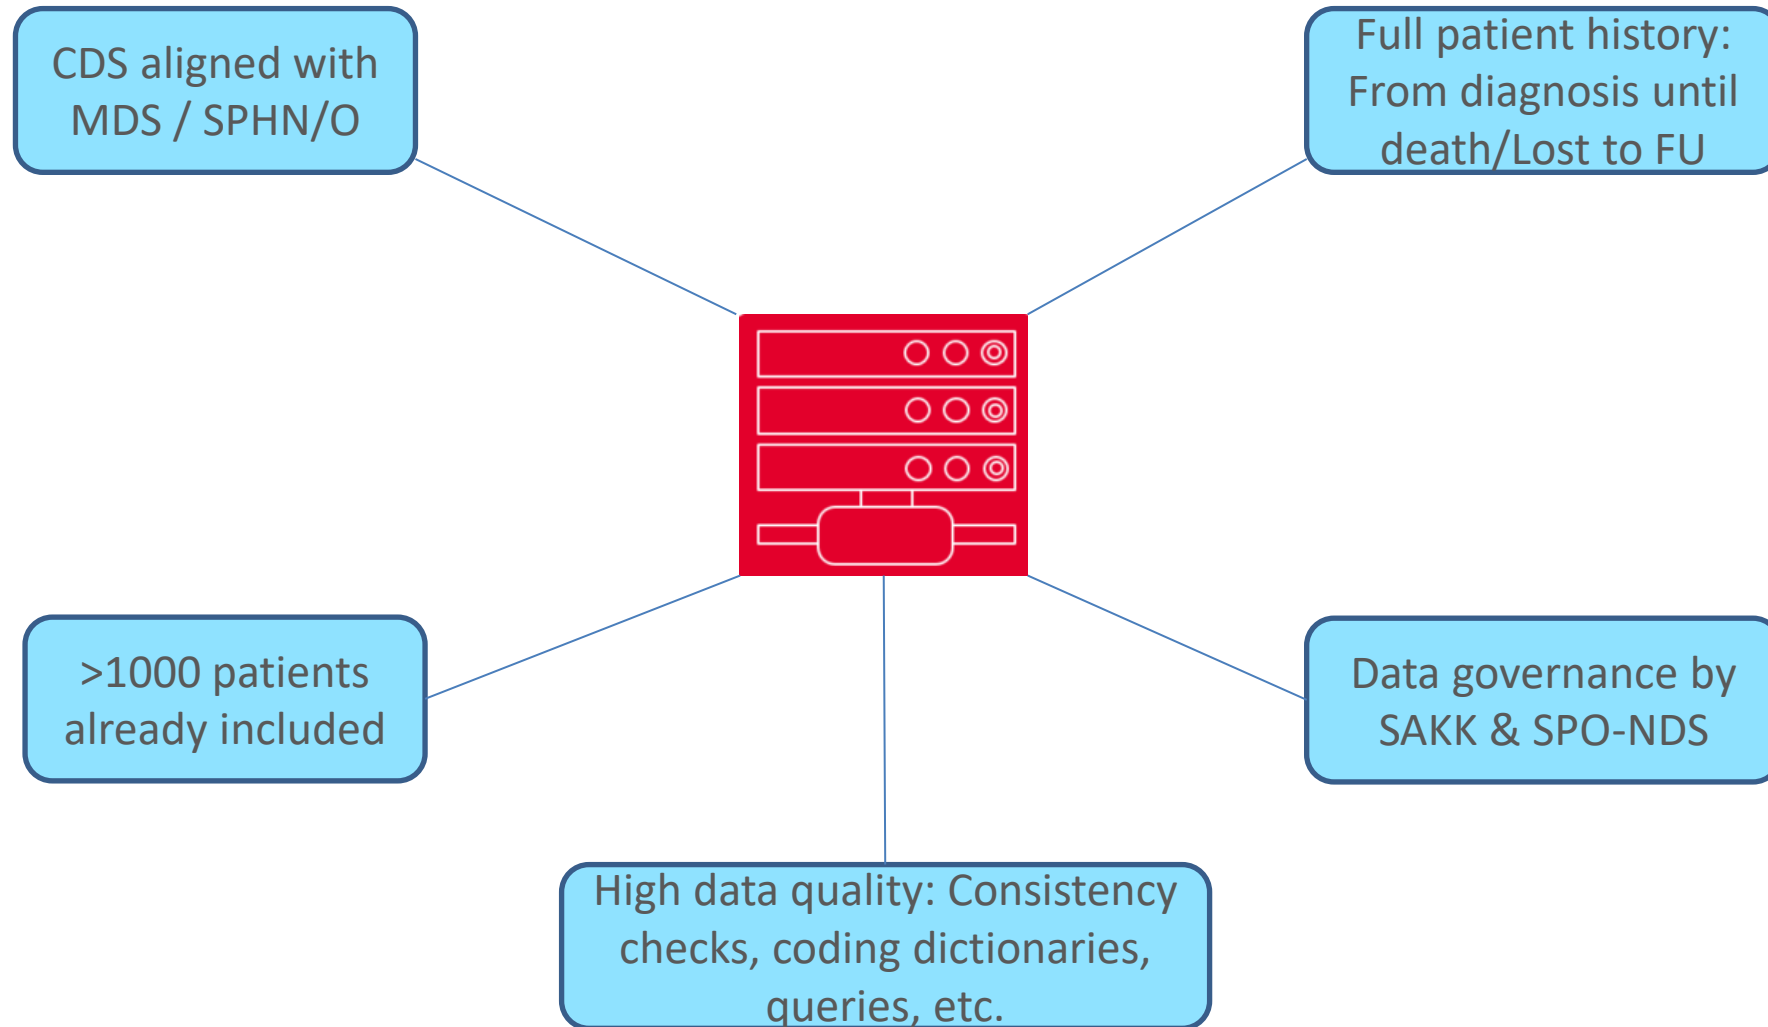

SCORED Status (II):

Two completed registries, good pipeline of new projects

Most important SCORED features

SCORED:

The Core Team at the Competence Center of SAKK in Bern...

Isabel Gysi
Data Architect

Jens Schulenburg
Head Clin Data Mgmt

Stefanie Hayoz
Head Statistics

Daniel Hugelshofer
PM SCORED

Zuzanna Maniecka-
Moser / CPD

Gisela Müller
CPM

Charlotte Maddox
Head Clin Proj Dev

... and: The oncologists and trial coordinators at the centers!
